

## Project update – Lake Charlegrark Precinct Development

April 2018

### Lake Charlegrark Precinct Development – project update

The Lake Charlegrark Precinct Development continues to gain momentum, with \$300,000 of the Commonwealth's Drought Communities Program funding going towards the project.

Work is on track for the amenities block to be completed by the end of June. The bricklaying is due to be completed in approximately 4 weeks followed by the installation of the roof trusses.

Planning has begun on the project at the Northern end of the caravan park including a new accessible Unisex Toilet along with a new BBQ as well as table and chairs. Garry Newman has been engaged to complete the design for the septic system. The completion of the entire Lake Charlegrark Precinct Development project is currently on track for the end of June.

Monthly project updates will be available on the [LCPD webpage](#) on the West Wimmera Shire Council website and on the West Wimmera Shire Council Facebook page.

The project is supported by funding from Regional Development Victoria, the Drought Communities Program, Lake Charlegrark Committee of Management, Lake Charlegrark Country Music Marathon and Goroke APEX Club.
